

Pumpkin for Dogs

How much to give, when to stop, and what to watch for.

Daily Dose by Weight

Mix plain canned pumpkin directly into your dog's food. Start with the lower amount and adjust based on results.

Your Dog's Weight	Per Meal	Times Per Day
Under 15 lbs	1 teaspoon	1 to 2
15 to 35 lbs	1 to 2 teaspoons	1 to 2
35 to 60 lbs	1 tablespoon	1 to 2
60 lbs and up	1 to 2 tablespoons	1 to 2

What to Buy and What to Skip

SAFE TO USE

100% pure canned pumpkin (only ingredient: pumpkin)
Plain cooked fresh pumpkin (no skin, seeds, or stem)
Pumpkin powder made for pets

ALWAYS AVOID

Pumpkin pie filling (sugar, spices, nutmeg)
Anything with xylitol (toxic to dogs)
Raw pumpkin (hard to digest)
Pumpkin spice flavored anything

When to STOP Giving Pumpkin

Pumpkin is meant as a short-term fix. Stop giving it and switch back to normal feeding once one of these happens:

- Stools have returned to normal for 24 hours
- Your dog becomes constipated (too much fiber)
- You notice excessive gas or bloating

- Your dog refuses to eat their food with pumpkin

SEE YOUR VET IMMEDIATELY if you notice any of these: diarrhea lasting more than 48 hours, blood in stool, vomiting, lethargy, loss of appetite, or a swollen belly. Pumpkin is for mild tummy upset only.
