

The Golden Paste Dosing Chart

How much to give your dog, by weight • Dr. Rick Hollister

Daily amounts of finished golden paste (turmeric + water + black pepper + coconut oil)

THE GOLDEN RULE: Start low. Go slow.

Begin at the Start amount. Increase a little every 2 to 3 days, only if your dog's stool stays normal, until you reach the Full amount. Always mix into food, and split the daily amount across meals.

DOG'S WEIGHT	START WITH (week 1)	BUILD UP TO (full amount)
Under 10 lbs	1/8 tsp once daily	Up to 1/4 tsp daily
10 to 20 lbs	1/4 tsp once daily	Up to 1/2 tsp daily
21 to 50 lbs	1/4 tsp twice daily	Up to 1 tsp daily
51 to 80 lbs	1/2 tsp twice daily	Up to 3 tsp daily, split
Over 80 lbs	1/2 tsp twice daily	Up to 4 tsp daily, split

These amounts are for finished paste, not raw powder. Turmeric leaves the body quickly, so smaller amounts given with each meal work better than one big serving.

GOOD SIGNS (give it 2 to 4 weeks)

- Moving easier, less limping
- Less stiffness after naps or rest
- More playful, more like their old self
- Note: a faint odd smell (like cat pee) is harmless. A pinch of Ceylon cinnamon fixes it

SLOW DOWN IF YOU SEE

- Loose stool or upset stomach
 - Vomiting or skipping meals
 - Low energy after starting
- Drop back to the last amount that was fine, hold a few days, then build up more slowly.

KEEP IT FRESH:

Store in a glass jar in the fridge, good for about 2 weeks.
Turmeric stains! Use a dedicated spoon and avoid plastic containers.
