

3-Ingredient Skin Cream

Make a soothing anti-itch cream right in your kitchen.

What You Need

Ingredient	Amount	What It Does
Coconut oil	2 tablespoons	Locks moisture in
Shea butter	1 tablespoon	Calms inflammation
Colloidal oatmeal	1 tablespoon	Draws moisture in, soothes itch

How to Make It

1. Make colloidal oatmeal: blend 1/2 cup of plain oats in a blender until it is a fine flour. Measure out 1 tablespoon.
2. Melt the coconut oil and shea butter together in a small pot over low heat until fully liquid.
3. Stir in the 1 tablespoon of finely ground oatmeal and mix well.
4. Pour into a clean glass jar and let it cool and set in the fridge for about 30 minutes.

How to Use It

- Rub a thin layer onto red, itchy, irritated areas
- Keep your dog from licking it for at least 30 minutes so it absorbs
- Store in the fridge, use within 2 weeks
- Apply once or twice a day as needed

FOR DRY, ITCHY SKIN, NOT YEASTY SKIN: This cream contains coconut oil, which can worsen yeast or active infections. If the skin is greasy, smelly, oozing, or musty smelling, skip this and see your vet.

BONUS USE: That finely ground colloidal oatmeal also makes a great soothing bath. Add a couple of tablespoons (more for a big dog) to warm bath water and let your dog soak once a week.
